

Standard Features:

Allows Serial Controller to Communicate Directly with RCI-XXX-RF2 series Remotes

Provides Access to up to 127 Remote RCI's

Bi-directional Communication using License-free 2.4GHz Radio Band

Spread-Spectrum Radio Technology Provides Reliable Communication

Re-Transmission & Error Correction Algorithms ensure Accurate Data Transmission

No Calibration Required

Microprocessor Controlled for High Accuracy

Power: 120 VAC or 24 VDC

High Noise Rejection

Function:

The RCI-SER-RF2 is a serial-to-radio interface. It allows PC's or PLC's to communicate directly with one or more RCI-XXX-RF2's. The standard MODBUS ASCII protocol used in the RCI-XXX-RF2 series allows for easy integration with existing software packages on both PC's and PLC's.

The host controller connected to the RCI-SER-RF2 controls the communication by sending out queries to each remote unit. The remote unit then replies with an acknowledgment if the data was received correctly.

The license-free spread-spectrum radio technology allows small systems to be set up with very little effort and at low cost. The technology ensures high communication reliability even in RF-intensive environments.

All units are sold with a ¼ wave omnidirectional whip antenna. Other antennas, such as directional Yagi or Patch antennas, are sold separately.

Options:

None available at this time

Specifications:

Media: 2.4GHz Spread-Spectrum Radio
Range: up to 1500ft indoors with omnidirectional antenna
up to 12 miles line-of-sight with directional antenna
Protocol: MODBUS ASCII
Speed: 9600 BAUD
Radio Power Output: 500mW max.
Operating Temperature: -4°F to +140°F (-20°C to +60°C)
Power: 120 VAC or 24 VDC
Enclosure: NEMA4X
Approvals: ETL 3118354;
UL 60950-1-2007; CSA-C22.2 No. 60950-1-07
